📍 General Trias City, Cavite, 4107

PROFILE

As a dedicated, passionate, and detail-oriented Web Developer, I am excited to bring my skills and expertise to a full-time position. With a strong ability to work both independently and collaboratively, I possess excellent logical reasoning and creative skills that enable me to tackle complex problems and consistently deliver high-quality work. I am eager to contribute my talents and gain valuable real-world experience as a full-time member of a team.

EDUCATION

Tertiary   **2019 - 2023**
Technological University of the Philippines - Manila
Bachelor of Science in Computer Science

Secondary   **2017 - 2019**
Lyceum of the Philippines - Cavite
Science, Technology, Engineering, and Mathematics

EXPERIENCE

Front End Intern   **Mar 2023 - Jul 2023**
ROC.PH Digital Marketing Services
- Creating designs using Figma.
- Implementing the designs through WordPress.
- Assisting team members who are having trouble using the tools.
- Providing a daily task report.

PROJECTS

PicTales (Thesis)   **Sep 2022 - Jun 2023**
Link: https://github.com/Xvareon/PicTales-Thesis
We developed PicTales, using Python and the capabilities of tkinter, to craft an innovative storybook generator. This groundbreaking tool, known as 'PicTales: Transforming Storytelling Through AI-Generated Images for E-Storybook Generation,' takes text inputs and transforms them into engaging slideshows, featuring AI-generated images, delivering an immersive educational experience.

MAJ Sweet Shoppe Website   **May 2023 - Jun 2023**
Link: https://majsweetsshoppe.ph/
I developed MAJ Sweet Shoppe, a captivating virtual sweet shop, utilizing WordPress, Elementor, and Figma. This visually appealing website entices visitors to explore and shop for a diverse range of delectable treats, providing an immersive and delightful online confectionery experience.
